

Lead Auditor in Environmental Management Systems *5 Days* (Delivered by New Zealand Quality College)

ASSESSING PERFORMANCE // IMPROVING QUALITY // CREATING CONFIDENCE

Purpose

Receive concentrated and comprehensive training in the theory and practice of environmental auditing. Gain a practical understanding of the responsibilities of an Environmental Auditor, and the techniques and methodologies required to effectively audit an Environmental Management System. You should already have a reasonable understanding of Environmental Management Systems as a prerequisite. Ask our Customer Service team for further details.

Learning Outcomes

Upon successful completion of this course participants will have gained the following knowledge and skills and be able to:

- Understand the intent and requirements of ISO 14001 and how to meet them
- Use environmental management tools such as aspect and impact evaluation to identify how an organisation's processes can impact on ecosystems
- Set up an EMS and document procedures to identify methods of environmental protection and assist in ensuring legal compliance
- Use monitoring and measurement techniques to evaluate effectiveness of your EMS
- Establish audit objectives, scope and criteria
- Schedule audits and develop site audit plans and audit guidance tools
- Organise and direct audit team members
- Gather objective evidence using interviewing, observation and sampling techniques
- Analyse and interpret information to determine conformance with requirements
- Report audit findings, prepare audit reports and undertake follow-up.

Who should attend?

The course is intended for those:

- Who wish to become a certified environmental auditor.
- Whose responsibility it is to audit an EMS.
- Whose responsibility it is to implement or maintain an EMS.
- Who will monitor the performance of an EMS

Achievement

Partnering with

ANDSAM
TRAINING

The New Zealand Quality College offers this course in partnership with ANDSAM Training, which provides training and assessment services specialising in the development, implementation and auditing of management systems. ANDSAM Training is approved by RABQSA International (RABQSA No. 013408).

Relevant RABQSA Competency Units

This course qualifies participants to become a Provisional Environmental Auditor under the RABQSA Auditor Certification Scheme. The training has been structured to address the elements of competency required under the RABQSA International competency units:

- RABQSA-EM Auditing Environmental Management Systems
- RABQSA-AU Auditing Management Systems
- RABQSA-TL Leading Management System Audit Teams.

Upon successful completion of the course, participants will receive a Certificate of Attainment.

Prerequisites

A working knowledge of **ISO 14001** is required before attendance.

The number of participants for each course is restricted to ensure a trainer / student ratio that will facilitate effective training outcomes.

Presenters

The team of trainers is led by Andrew Schofield and Robert Crowe, who have been consulting and auditing for over 20 years in organisations from small businesses to large multinationals throughout Australasia, South East Asia, the United Kingdom and Europe.
